Artificial Intelligence (AI) in your business processes – Consultancy for all industries

Integrating Artificial Intelligence (AI) into your business processes is more than just a trend
- it is a valued support for your success, especially when new requirements arise at short notice.
All industries, especially **your** own business unit, are facing a wide range of challenges where AI-based solutions can provide the decisive competitive advantage.
This is increasingly true for your IT department, for marketing, for your corporate and your company management.

My Offer:

- Specialist advice for the integration of artificial intelligence (AI) into your business processes.
- Special focus on your industry, with in-depth experience in medical technology, communications technology and the automotive industry, among others
- Use of OpenAI's **Chat-GPT**, **Aleph Alpha Luminous** o. Google **Gemini** for even more efficient operational processes through significant time savings, e.g. in software development
- Support in avoiding unexpected and hidden usage costs

Why Volker Kohl with his nova motum?

- Experienced AI specialist with in-depth know-how for the target industries
- Comprehensive understanding of complex process flows and their challenges
- Focus on your own workflow processes, e.g. IT and on the needs in your industry

My services:

1. **Analysis and Consultancy:** Together with your teams, I analyse your existing operational processes and identify potential for the integration of AI. Based on my many years of experience, I develop customised solutions for you that meet your specific requirements
2. **Implementation of AI solutions:** I support you in the implementation of AI technologies, including the optimised use of OpenAI's **Chat-GPT**, **Aleph Alpha Luminous** o. Google **Gemini**
3. **Optimising software development processes:** Optimise your development processes and increase their efficiency by using my experience to choose from more than 400 code languages supported by openAI/chat-GPT
4. **Management of hidden costs of AI solutions:** To avoid unexpected and unforeseen costs when switching to artificial intelligence (AI), I help you to ensure transparency and control over billing quotas when using AI interfaces (API)

References:

- Successful implementation of application solutions for more than 25 years in leading companies in medical technology and communication technology, and the automotive industry,
  e.g. Vodafone Global, Phonak/Sonova, Gigaset, Technical University of Berlin

Keywords:

- OpenAI Chat-GPT 4 (prompting, GPT creation, API); Aleph Alpha Luminous;
  Google Gemini; Hugging Face LLM; Jupyter Notebook; Python

Contact me to optimise your business processes and fully exploit the potential of Artificial Intelligence in your company – of course combined with Human Intelligence (HI)...
